

Explosion Diverter

APPLICATIONS

The **Explosion Diverter** valve with an explosion panel is the ideal addition to any exterior process flow duct system where there is potential for hazardous explosive overpressure or multiple explosive events. This device helps reduce the potential for system damage caused by high overpressure and rapid flame front expansion.

CERTIFICATIONS & STANDARDS

EN 14491
EN 14797
NFPA 69

STANDARD FEATURES

- Flat explosion vent panel VL or domed explosion vent panel VD

OPTIONAL FEATURES

- Stainless steel construction
